	North	**Central**	**South**
Projected Amount	1-2”	1-2”	1”
Precipitation Type	Rain to Snow	Rain to Snow	Rain to Snow
Ice Melt Run (Pre-Approved) Start:	TBD	TBD	TBD
Ice Melt Run (Pre-Approved) End:	TBD	TBD	TBD
Anticipated Plow Start:	TBD	TBD	TBD
Anticipated Plow End:	TBD	TBD	TBD

Additional Notes:

Light Rain and drizzle will start later this afternoon as temperatures will be above freezing. As the day progresses into the evening, temperatures will begin dropping. After midnight, temperatures are expected to be at or below freezing, which will allow for freezing rain to possibly develop. Freezing Rain will eventually turn over to Light Snow. The amount of freezing rain should be minimal, but any freezing rain is dangerous. Snow will continue into the early afternoon of Tuesday producing 1 -2” in North region and Central region, with lesser amounts likely in the South region. Most snowfall should be completed by 1-3:00pm Tuesday, followed by flurries into Tuesday evening. As all precipitation exits the area, very cold air will be ushered in. Temperatures expected to be near 20 degrees by 5:00pm Tuesday. Any untreated snow or freezing rain on surfaces will likely remain through balance of week as temperatures will remain at or below 20 degrees.

With rain and possibility of freezing rain falling before turning to all snow, surfaces under the snow will be extremely slick and de-icing should be considered.
